Regarding the reception of men discharged from the service, your attention is called to a phase of the matter which can be very easily overlooked. The individual man returning feels that he is entitled to some sort of a celebration. We suggest that some informal procedure should be worked out in each community so that very human feeling on the part of the returning soldier will be gratified and his morale sustained at a time when his readjustment to civilian conditions may cause an undesirable mental reaction.

We suggest particularly that the task of providing a reception for returning soldiers and sailors immediately or shortly after their return could be very well handled by the many groups that are found in every community; each group arranging for an informal reception of some kind for the man in whom they have a peculiar interest. The function of the general community organization is to see that the need of this sort of thing is brought to the attention of all interested. Therefore, we urge upon every county chairman to see that every man returning from service will be given some proper celebration fitting his return.

Very truly yours,  
Rutledge Smith,  
Chairman & Field Secretary.

Prof. Butterworth, of Nashville was here two days this week. He came up with the intention of excepting the position in the high school here, recently vacated by Prof. J. F. Gaines, but owing to the fact, that he failed to find room and lodging, he was obliged to return to his home in the city. What a great pity that the people here can't see the advantages of having a dormitory erected at once. School can never be what it should, with out one, and why not have the matter attended to at an early date. All on earth the school lacks at the present time, is a dormitory. Pupils from every part of the county are continually leaving here, to enter school elsewhere, all because they can't get a place to board. It's a shame and a disgrace to the whole community. Build a dormitory, and watch the school grow.

## A FAMILY MEDICINE

In Her Mother's Home, Says This Georgia Lady, Regarding Black-Draught, Relief From Headache, Malaria, Chills, Etc.

Ringgold, Ga.—Mrs. Chas. Gaston, of this place, writes: "I am a user of Thedford's Black-Draught; in fact, it was one of our family medicines. Also in my mother's home, when I was a child. When any of us children complained of headache, usually caused by constipation, she gave us a dose of Black-Draught, which would rectify the trouble. Often in the Spring, we would have malaria and chills, or troubles of this kind, we would take Black-Draught pretty regular until the liver acted well, and we would soon be up and around again. We would not be without it, for it certainly has saved us lots of doctor bills. Just a dose of Black-Draught when not so well saves a lot of days in bed."

Thedford's Black-Draught has been in use for many years in the treatment of stomach, liver and bowel troubles, and the popularity which it now enjoys is proof of its merit.

If your liver is not doing its duty, you will suffer from such disagreeable symptoms as headache, biliousness, constipation, indigestion, etc., as unless something is done, serious trouble may result.

Thedford's Black-Draught has been found a valuable remedy for these troubles. It is purely vegetable, and acts in a prompt and natural way, regulating the liver to its proper functions and cleansing the bowels of impurities. Try it. Insist on Thedford's the original and genuine. 27c

A young lady came in and asked the young man to show her some "drilling." Becoming somewhat confused as to what she meant by "drilling," he replied: "you will have to see Bud, our colored man, he looks after the hardware." Just what answer she made we have failed to learn.
